INCREDIBLE SOLUTION

- ✓✓✓ New Generation
- Consistent Temperature
- Uniform Pressure
- Simple to Use
- Good for All Fabric

Widely used in garment industry where heat and pressure is required, including sewfree fabrication of cuff heming, etc.

(Patent Pending)

With over 15 years of experience and know how, H&H is proud to present the latest development in heat press technology - the new CS-029 Pneumatic Cuff Press Machine. This machine is widely used in garment industry where heat and pressure is required including sewfree fabrication of cuff heming, etc.

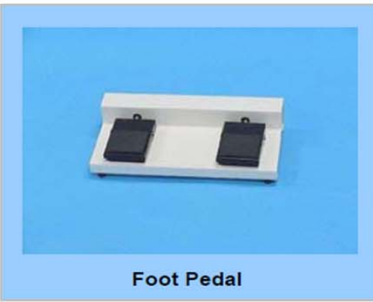

This pneumatic operating machine has vertical press action and automatic timing function, when the preset time is reached, the heating plate will automatically rise to ensure the same condition is applied every time. Self-leveling platform ensure uniform pressure on clothes. High plate clearance during standing by provides a wide open view of working area, so loading material is easy. Safety bar design to protect operator from injury. Foot pedal control is used so both hands of operator can be free to handle fabric. CS-029 is specially designed to work on cuff area so it can greatly improve your product quality and production efficiency.

- Detachable lower platform cover
- Vertical press motion
- Self leveling platform
- Foot pedal activation
- Preset heating time
- Safety Bar

**Efficiency + Quality + Reliability +
Originality is Second to None**

CS-029 Specifications

- ~ **Power Supply**
AC 220V 50/60Hz single phase
- ~ **Power Consumption**
1250W
- ~ **Compressed Air**
> 0.4 Mpa
- ~ **Heat Temperature Range**
Room Temperature - 300°C
- ~ **Press Duration**
1 - 999 Seconds
- ~ **Heat Press Size**
φ 85mm x 55mm x 85mm
- ~ **Lower Mold Size**
φ 35mm x 55mm
- ~ **Overall Dimensions**
750mm(L) x 400mm(W) x 1220mm(H)
- ~ **Overall Weight**
67kg
- ~ **Options**
