

**ASU58-55**  
**ASU58-75**

## Drive Technology

The AS58 series of servo motors is designed to drive industrial sewing machines from overlock and safety stitch machines to coverstitch machines and light to heavy duty lockstitch sewing machines.

### MAIN FEATURES:

- Programming function direct on control box
- Stepless speed control
- Needle positioning
- Thread trimmer
- Thread wiper
- Auto foot lifter
- Auto back-tack
- Air blowing
- Suction
- Optional Operator control HMI-60
- Optional programmer control HMI-50
